

# TeleSpy™ - Who, What, When, Where & Why

**No Monitoring Fees...Ever!, and it's a regular telephone!**

# TeleSpy™

**ListenUp!**  
PATENT PENDING

**INTRUSION NOTIFICATION SYSTEM**  
The Worlds most practical Intrusion Detector

**Q: Who can use a TeleSpy™ telephone?**

A: Everyone.

**Q: What is a TeleSpy™ ?**

A: It is a full featured, portable telephone with an integral proximity-sensor intrusion security system and auto-dialer. The TeleSpy™ detects intruders up to 30 feet away using a Passive Infrared sensor. After someone crosses the beam, you will get a call within seconds. The sensitive microphone allows you to listen in to the sounds in that space for about 30 seconds then it disconnects and rearms to detect again and again. This listening period gives you the opportunity to decide "Friend or Foe" and take immediate actions to protect your family or possessions. You possess a portable, security alarm system but no monitoring delays, multi-year monitoring contracts and no fees.

**Q: When will I use it?**

A: Use the TeleSpy™ (1) any time you need to make a telephone call or (2) need to have a private butler watch a certain area and call your cell, home or business phone when anyone enters that same restricted area. Your private butler protects you.

**Q: Where can I use this portable, intrusion security system and telephone?**

A: Any place that has a modular telephone jack and an electrical power outlet. Simply plug the TeleSpy™ in just like a regular telephone (which it is, but with a few surprises) and then plug in its low voltage transformer and power cord.

**Q: Why would I use a TeleSpy™ ?**

A: Use it to (1) make and receive telephone calls or (2) use it as a portable, covert, monitoring-fee-free, 24/7/365, intrusion security system and auto-dialer. Eliminate the delay between an alarm system's call to a monitoring company phone room in a foreign country and their call-back to the local police. Listen in, identify a burglary-in-progress, call your Police and receive the highest priority Police treatment, second only to an "Officer Down" priority. Help your local Police Department by eliminating false alarm calls and allowing them to respond to true, confirmed "burglary-in-progress" calls. Please support your local Police Department.

**TeleSpy™** PATENT PENDING Detects intruders up to 30 feet away,

... Then it calls you and lets you listen for about 30 seconds before re-setting

**DIRECTIONS:**

1. Enter phone number to be called in the event of an intrusion. (Same as redial or last number called)
2. Turn TeleSpy power switch "on". The last number is quickly called. Answer, then hang up (or not). After about 60 seconds the TeleSpy is armed. To deactivate, turn power switch off.
